

AUTOMATIC DRINKING FOUNTAIN IN STAINLESS STEEL, WITH SENSOR A-88 2OP

Ref: 2030.193.031
Magnus

Exterior and interior made in stainless steel.

Touchless water activation by automatic activation by sensors.

Elegant and robust fully integrated faucet in the dispensing area.

Hygienic faucet design: hidden water jet, separated from faucet walls, difficult to reach.

Flat top plate enables bottles to stand properly.

Vandal resistant model, the top plate can not be removed, allen screws.

Easily regulated cold water temperature (thermostat).

The installation of a purification filter is recommended for better water quality.
